Smart Curriculum Activity & Attendance App

Category (Hardware / Software / Both): Software

Problem Description:

Develop an integrated mobile/web application that automates curriculum activity tracking and student attendance management. The system should provide real-time monitoring of student participation in academic and co-curricular activities, generate comprehensive attendance reports, and facilitate better academic planning and student engagement tracking. The solution should be scalable, user-friendly, and integrate with existing educational management systems.

Project Object:

- Automate Student Attendance Management
- Digitally Track Curriculum Activities
- Improve Academic Transparency and Accountability
- Centralize Academic Data Management
- Enable Data-Driven Academic Decision Making
- Support Data-Driven Academic Decision Making
- Improve Faculty Efficiency and Time Management
